

SHAHRIAR RAHMAN

Scarborough, ON, Canada | [+1 \(438\) 408-2088](tel:+14384082088) | shahriarr246@gmail.com

Objectives

A builder, designer, and published researcher with a deep learning paper in Springer (2026) and real experience designing and developing intelligent web and mobile applications. Led the full UI/UX design of a financial investment platform, focusing on making complex data simple and trustworthy for everyday users. Drawn to understanding how people interact with AI and how thoughtful design can make that experience feel more natural and human. Seeking a fully funded thesis-based MSc in Human Computer Interaction and Human AI Collaboration.

Education

Bachelor of Science in Computer Science and Engineering

2021 – 2025

United International University (UIU) — Dhaka, Bangladesh

CGPA: 3.46 / 4.00 — Equivalent to 83–84% on a percentage of UIU scale

Publications

Akter, T., **Rahman, S.**, Billah, A., Haque, A., & Rahman, R. (2026). *A Deep Learning Approach for Indoor Plant Health Monitoring: Classification of Healthy, Unhealthy, and Dead Plants*. In: ICT for Intelligent Systems — ICTIS 2025. Lecture Notes in Networks and Systems, vol. 1510. Springer, Singapore.

Work Experience

Full-Stack Developer

2025 – Present

AvranceCorp Developments — Toronto, Canada

- Designed and developed TradeREA, a real estate tokenization platform, owning the full stack across an investor portal, admin panel, live trading interface, and KYC/compliance workflows from design to deployment.
- Currently developing the TradeREA mobile application for Android and iOS using Flutter, translating the web platform's design system into a seamless mobile experience.
- Designed the full UI/UX for web and mobile interfaces, transforming complex financial data including real-time order books, portfolio analytics, and dividend tracking into clear and intuitive experiences for non-technical investors.
- Developed an ML anomaly detection system for real-time suspicious login identification.

Project Work

ML-Based Login & Auth Fraud Detection

Jan – Feb 2026

Python · Isolation Forest · Scikit-learn · Node.js · Express.js

- Developed and deployed an anomaly detection system to identify suspicious login attempts on the TradeREA platform using Isolation Forest with automated alerting.

Network Intrusion Detection System

Jun – Oct 2025

[Python](#) · [CNN](#) · [Random Forest](#) · [SVM](#) · [K-NN](#) · [Scikit-learn](#)

- Put together an ensemble ML system — CNN, Random Forest, SVM, and K-NN — to catch network intrusions on real-time traffic. The interesting part was getting the false positive rate down without sacrificing speed.

Job Scraping & Smart Categorization Pipeline

Jan – Nov 2025

[Node.js](#) · [Puppeteer](#) · [Express.js](#) · [React.js](#) · [LLMs](#)

- Scraped job listings from multiple sources and used an LLM to automatically tag each one by role, company, and location — saved a lot of manual sorting and was a genuinely fun applied NLP problem to solve.

Indoor Plant Health Detection — Published Research

Oct – Dec 2024

[Python](#) · [YOLOv8–v11](#) · [PyTorch](#) · [TensorFlow](#)

- Led the deep learning side of a research project classifying plant health from around 1,300 images. Ran a comparison across YOLOv8 through YOLOv11 with majority-vote ensemble — YOLOv11 came out best, and the work ended up published in Springer.

Student Resources & Services Platform

Jan – Apr 2024

[React.js](#) · [Node.js](#) · [Express.js](#) · [MySQL](#)

- A full-stack web platform built with a small team for fellow students — exam resource search, a digital library, and a housing finder all in one place.

Technical Skills

AI / ML: PyTorch, TensorFlow, Scikit-learn, HuggingFace, YOLO, Computer Vision, NLP, LLMs

Design: Figma, UI/UX Design

Mobile: Flutter, Android, iOS

Languages: Python, JavaScript, C/C++, Java

Web & Backend: React.js, TailwindCSS, Next.js, Node.js, Express.js, PostgreSQL

Cloud & Tools: AWS (S3, EC2), Docker

Extracurricular Involvement

Member — UIU Computer Club (UIUCCL)

2022 – 2024

[United International University](#) — [Dhaka](#)

- Took part in workshops on Android dev, UX/UI design, and web development — including Google's Android Study Jam and a Design Thinking Workshop organized by the club.

Member — UIU Robotics Club

2022 – 2023

[United International University](#) — [Dhaka](#)

- Finished the Electronics & Basic Robotics track, collaborated on a few hardware builds, and joined the 'Outside the Circuits' STEM webinar series.

Volunteer — CSE Project Show

2022 – 2024

[United International University](#) — [Dhaka](#)

- Helped run the annual student project exhibition across multiple years — coordinating with teams, setting up displays, and guiding industry guests through the showcase.
